

FC2

```
graph TD; FC2[FC2] -- "Feature 1" --> uLBP[uLBP]; FC2 -- "Feature 2" --> SIFT[SIFT]; uLBP --> Image1([Image]); SIFT --> Image2([Image]);
```

The diagram illustrates a neural network architecture. At the top is a purple rounded rectangle labeled 'FC2'. Two arrows originate from the bottom of 'FC2': the left arrow is labeled 'Feature 1' and points to a light green rounded rectangle labeled 'uLBP'; the right arrow is labeled 'Feature 2' and points to a light green rounded rectangle labeled 'SIFT'. From the bottom of 'uLBP', an arrow points down to a dark green oval labeled 'Image'. Similarly, from the bottom of 'SIFT', an arrow points down to another dark green oval labeled 'Image'.
